

ABC 1220

Features

The Hawkins switch mode battery chargers are attractively designed high performance 3-stage compact microprocessor controlled automatic chargers. These chargers are particularly suited for standby applications and may be left connected to the battery indefinitely.

Detailed Specifications

Output Voltage Equalise	:	14,6 ±0,2 V d.c.
Output Voltage Float	:	13,7 V d.c.
Output Current	:	20 ± 1 A
Input Voltage	:	200 - 240 V a.c.
Input Frequency	:	47 - 53 Hz
Input Power	:	294 W
Input Efficiency	:	<87% Full load
Dimensions L.H.W.	:	225/70/152 mm
Weight Nett/Gross	:	2 Kg

- Complies with SABS IEC 335-2-29
- Thermal overload protection
- Over temperature protection
- Short circuit protection
- Reverse polarity protection
- Digital front panel meter for voltage, current and energy display
- Stylish anodised aluminium extrusion
- Two year warranty

In the interest of product improvement, specifications may change without notice.
